SUMMARY

MCA and CDAC-certified Java Developer skilled in Java, Spring Boot, and MySQL. Experienced in developing secure, role-based web applications with RESTful APIs and authentication mechanisms. Strong in problem-solving, backend architecture, and collaborative software development using modern development practices.

SKILLS

Backend Java, Spring Boot, Node js
Frontend React.js, HTML, CSS, JavaScript, Bootstrap
Database : MySQL, SQL
Tools : Git, Postman, VS Code, Github, STS4

EDUCATION

Post Graduate Diploma in Advanced Computing, CDAC Juhu
Feb '25 — Aug '25
Mumbai, India

Master of Computer Application, ASM Institute of Business Management and Research
Mar '21 — Apr '23
Pune, India

- Grade: First Class with Distinction

Bachelor of Computer Application, G.H. Raisoni College of Arts, Commerce and Science
Mar '17 — Apr '20
Pune, India

- Grade: First Class

PROJECTS

Logistic Solution Link

- Developed an Android-based logistic management system facilitating easy stock management from warehouse to specified locations.
- Prepared features to store stock in warehouses and efficiently shift stock to desired sites using designated drivers.
- Admin interface enables monitoring of all processes including driver details and updates on stock movements within the warehouse.

AdoptoCare Link

- Designed and developed AdoptoCare, a role-based pet adoption and care management system using Spring Boot as the backend
- Implemented secure REST APIs with JWT authentication, role-based access control (Admin, User, Shelter, Vet), and CRUD operations for pets, health records, appointments, and adoption requests.
- Built a responsive frontend in React.js using React Router, Axios, and Bootstrap to deliver real-time interaction and a seamless user experience across all roles.
